John Vanderkooy is back once again to give us a review of the papers presented at this year's AES convention in New York. For those who couldn't attend the conventions, this is an excellent opportunity to get an overview of the papers presented in an informative and digestible format.

Mike Nunan, who along with his CTV colleagues were in New York "hunting big game", will report on what they caught.

Various Workshop, Tutorials, Master class and Exhibition Floor reviews from the convention will be provided by AES exec members Jim Hayward, Sy Potma and Earl McCluskie.

At the NY convention, past-Toronto section chair **Neil Muncy** received a Fellowship Award (in the company of other recipients such as Bob Ludwig and Phil Ramone), for contributions in noise susceptibility and electromagnetic compatibility in audio systems.

We will be re-presenting this award to Neil here in Toronto on behalf of our section.
