Rational Acoustics' Smaart v7 and Studio Six Digital's AudioTools and Smaart Tools

A demonstration of the latest from Rational Acoustics and Studio Six Digital for live sound reinforcement measurement software. Smaart 7 is a completely rewritten software program that supports simultaneous multichannel FFT measurements on either the Mac or Windows operating systems, both 32 and 64 bit.

New features include 48th octave resolution, Live IR, TF delay tracking, improved GUI, spectrograph history, and much more efficient engine architecture allowing as many inputs as your interface will support and the CPU is capable of handling.

AudioTools is an iPhone/iPad app that includes a suite of useful modules for audio measurement, including SPL, RTA, Impulse Response, Speaker tests, STI-PA, and under license from Rational Acoustics, Smaart Tools as well, including a forthcoming dual channel FFT!

Arthur Skudra

Based out of Hamilton, ON, Mr. Skudra works as an audio-visual consultant for sound reinforcement systems in large auditoriums, houses of worship, boardrooms, and classrooms. He also optimizes sound systems for installations and large events, and is an instructor for Smaart software. Previously he has served as a technical director and contractor, and has completed graduate degrees in Education and Communication.
